About Landsystems and Associates

A Landscape Collaborative – Committed to Excellence, Since 1986
From Concept to Creation and Beyond

Landsystems and Associates is a collaborative design group dedicated to sustainable site appropriate landscape planning. Our goal is to provide informed, environmentally responsible design solutions at a reasonable cost to the client. We specialize in innovative new construction and renovation design solutions that integrate function, style and budget. Past projects include urban garden design, custom homes, large rural properties, affordable multi-family housing, model homes, commercial LEED design, parks and open spaces, and watershed restoration. Our wide network of local consultants and excellent relationships with local agencies broaden the expertise of services offered and assure project success. We offer an extensive spectrum of services:

- LID Site and Space Planning
- Conceptual Master Plans
- Custom Residential Garden Design
- Planting and Irrigation Design Documents and Details
- Native Plant Restoration, Revegetation, and Slope Stabilization
- Water Wise Landscape Design (Xeriscape)
- Green Roofs
- Grey Water Systems, Rainwater Harvesting, Pumps and Wells
- Permaculture System Design
- Cactus and Succulent Gardens
- Patio, Swimming Pools, and Water Features
- Fire safety management for rural landscapes
- Irrigation Audits and Water Management
- Plant Procurement
- Construction and Maintenance Commissioning
- Special Occasion Landscaping
